### About Electro Power Systems

Founded in 2005 as spin-off of the Politecnico di Turin (Italy) and pioneer of hydrogen technologies, Electro Power Systems (EPS) is a forerunner of sustainable energy applications, and specialized in energy storage systems. The main areas of focus of the Group are integrated solutions for energy and backup applications in the ICT and data center industry, grid support in countries with heavy penetration of renewables sources, and off-grid power generation in emerging economies. In a nutshell, clean energy storage solutions, at a lower cost, with no need for subsidies.

EPS is today listed on the French regulated market of Euronext, with headquarters in Paris, R&D and Manufacturing in Italy (Turin) and premises in the USA (California and Michigan). In 2010 EPS started the development of the first oxygen and hydrogen battery worldwide, a system able to store massive amounts of energy at a cost lower than any other solution in the market. This innovative technology, covered by 123 patents and patents applications worldwide, is able to store energy exploiting exclusively the water cycle, without any emission or toxic or heavy metals. Since 2012 the product has been pre-commercialized and so far EPS has installed in aggregate 579 systems, 31.7 MWh of energy stored in 18 countries worldwide, including Europe, USA, Australia, China, Indonesia, India and South Africa.

The Group led by Carlalberto Guglielminotti as CEO, supported by Luca Dal Fabbro, Giuseppe Artizzu and Ilaria Rosso, is a global organization which counts 61 human resources and partners between Europe, South Africa, USA and Singapore, of which 37 people involved in research and development projects.

The huge effort in R&D enabled the development of a unique technology, covered by patents in 48 countries worldwide, granting to the Group the possibility to be named “World Technology Pioneer” by the World Economic Forum, included in the 100 Cleantech Global by the Cleantech Group but also selected between the worldwide excellences by the Cleantech Forum in San Francisco and Rotterdam.

To enhance the phase of development and global commercialization, the Group has successfully completed in April 2015, with the support of Société Générale as Global Coordinator, the Initial Public Offering of its shares on the regulated market Euronext Paris with a market capitalization of Euro 52 million euros.
